### Tough, easy clean, stylish handsets

**St Albans, UK, 23 June 2010:** ICON is pleased to announce that the Polycom KIRK 7000 series of tough, easy clean, hygiene friendly handsets are now available to its Channel Partners.

These Polycom KIRK 7000 series handsets with the ICON value added package of services included are available to order only from ICON.

There are three handsets in the range, the KIRK 7010, 7020 and 7040. The handsets are International Protection (IP) rated and are resistant to disinfectants. A range of alarm icons means the handsets are ready for integration with third party alarm and equipment monitoring solutions. The KIRK 7020 and 7040 have a membrane keypad for easy cleaning. The 7040 is equipped with a tear-off string alarm, man down, no movement and running detect and is Bluetooth enabled.

Mark Shane sales manager at ICON commented,

*“These handsets are a good choice when an extra tough handset is needed, or where hygiene or cleanliness is a concern, or personal safety an issue*

*The handsets have the same features and robust build quality as the 6000 series handsets but the styling is more suited to the busy professional environments found in sectors such as healthcare, retail, food or hospitality.”*

For dealers interested in learning more about the advantages of installing a mobility solution using these handsets ICON offers one to one product familiarisation and sales and installation instruction through its nationwide network of account managers.
