### ICON provides ISDN connectivity for Xcelerator IP™

**St Albans, 5 March 2008** : The complete office solution Xcelerator IP™, from Vertical Communications, can now be connected to ISDN trunks. The ISDN Xcelerator IP™ solution is offered by ICON as a fully supported bundle. The bundle comprises an Xcelerator IP with an ISDN Gateway.

The bundle is ideal for companies who want to deploy the Xcelerator IP™ but don't want to commit to using SIP trunks.

Mark Shane, sales manager at ICON commented, "The ISDN Xcelerator IP™ bundle will appeal to those businesses who would like to be IP ready when 21 CN and SIP trunks become more widely available. The bundle means that they can buy an IP PBX solution now, run IP internally but use an IP Gateway to connect to the PSTN in the interim."

Xcelerator IP™ is a low cost, ready to go, out of the box, VoIP business phone system with an integrated data networking solution. It is a complete office solution. Xcelerator IP™ is a wireless network and telephone solution for the small office or home office which supports up to 24 IP telephones plus additional office devices. About the size of a text book it provides all the functions required by the small and home office. These include;

- Businesses phone system
- Wireless access point (WiFi AP)
- Data networking (router)
- Internet access
- Firewall

Xcelerator IP™ is manufactured by Vertical Communications one of the largest business telephone vendors in North America and a global leader in the design and development of VoIP business phone systems. In 2007 Vertical Communications was ranked 7<sup>th</sup> in the US market above Mitel and Shortel. In the UK, Xcelerator is distributed for Vertical by ICON.

Xcelerator IP is truly a groundbreaking product. It combines the essential office functions of telephony and data networking into one solution and offers this at a market leading price in the SOHO market. For more information;
